

Amelia's ADAPTATION NOTES

- What is currently happening?

Clean up time is difficult. It is very chaotic and hard to get the children to clean up. It causes stress for all and then has a negative impact on the rest of the day.

- What would you like to see happen?

I would like all the children to help on their own. I can't be everywhere at once. I need it to be quieter because right now no one can even hear me.

- How can we change the environment?

Label bins and shelves with pictures to show where toys and materials belong.

- How can we change the activity?

Incorporate songs and music into clean up time.

- How can we change the materials?

- How can we change the requirements or instructions?

Alert children verbally & nonverbally that they have 5 more minutes of free play before it will be time to clean up.

- How can we provide assistance?

- After you have made the changes, what is currently happening?
