

UNIVERSAL ASSISTIVE TOOLS PILOT

PRE-CHECK

Use this Pilot when you can check **ALL** of the boxes below:

- We systematically excluded the need to use a Pilot for the physical environment; **OR** we completed a Pilot for the physical environment and addressed the physical environment features that created barriers to the child's participation in a routine or activity.
- We think the addition of universal assistive tools will further support the child's participation.
- We identified a gap between the child's ability and adult expectations in the way a child participates in a routine or activity; **OR** a particular daily routine or activity is not working well.

If there are boxes left unchecked, complete the appropriate Pilot.

PROCEED!

Child's Name: _____ Date: _____

Your Name: _____

Setting: _____

Additional Team Members:

CAR Process and Universal Assistive Tools

Reminder: Universal assistive tools include any item, piece of equipment, or product system that is “off the shelf” or readily available to the public. Universal tools are easily embedded into a child’s setting and immediately make activities more accessible to a child. They may benefit children with and without disabilities. However, when universal assistive tools intentionally are selected by adults and used by a child with a disability to participate in ways the child otherwise would not be able to do, the items are considered assistive tools.

Who: The team may include the professional classroom staff, community agent, family members, and other stakeholders.

How:

Collaborate with classroom staff and consider possible universal assistive tool solutions to address one to three routines or activities that are not working well. Complete the core worksheets on the universal tool to-do checklist. If your district or program has included other core worksheets, complete those as well.

Try universal assistive tool solutions for one to two weeks. Assess and document outcomes.

Review the information collected along with data from any actions taken to determine if the child is participating more fully in the selected routines and activities.

Consider: Is the routine or activity working well? If it is, the team might continue with the current plan. If it’s not, continue to use the CAR process and complete the modified assistive tools Pilot.

Universal Assistive Tools Pilot To-Do Checklist

Use the checklist to explore solutions. Spend one to two weeks trying solutions.

WORKSHEET #1

Itinerary of Daily Routines and Activities

Step 1

Information collected will identify routines and activities where assistive tools and/or physical environment features may be useful or are already being used.

- List the child's current daily routines and activities. To get you started, the Routines and Activities Starter Sheet (found

on the USB drive) offers typical examples in the home and in the classroom.

- For each routine and activity that you list, record a check mark in one box under column (A) and in one box under column (B).

Child's Name		Setting (home, community, school, classroom)						
Name(s) of Individual(s) Completing Step 1	(A) Generally, <i>how satisfied</i> are you with how this activity is going?				(B) How is the child's <i>participation</i> in this activity meeting your expectations?			
	Not Satisfied	Somewhat Satisfied	Satisfied	Very Satisfied	Does Not Meet	Occasionally Meets	Meets	Exceeds
List Routines and Activities								

WORKSHEET #1 (CONTINUED)

Step 2

From the list of routines and activities you recorded in Step 1, identify and record up to three that you identified that fell into the **red zone** for both columns (A) and (B).

- Answer questions (C), (D), (E), and (F) to create a baseline data point by placing a check mark in the appropriate box in each column.
- Starting with the baseline and for each additional data point, print out and draw a line (or trace with your fingers) from

the previous check mark to the current check mark. A line drawn straight down (|) indicates no change; a line drawn toward the bottom right corner of the page (\) indicates improvement; a line drawn toward the bottom left of the page (/) indicates a red flag and should be examined.

- Determine the time frame for collecting the information and record it in the time boxes at the end of the form. Also, transfer the recorded dates to Worksheet #2.

Name(s) of Individual(s) Completing Step 2	Data Collection Point*	(C) Typically, <i>how often</i> does the child have the chance to participate in this activity?			(D) Typically, <i>how involved</i> is the child during this activity?			(E) How is the child's <i>participation</i> in this activity meeting your expectations? <small>For baseline, transfer responses from STEP 1, Column B.</small>			(F) Are there <i>physical environment features and/or items that if taken away</i> would prevent the child from participating in this activity?
		Once Each Week	A Few Times Each Week	Once Or More Each Day	Not Very Involved	Somewhat Involved	Very Involved	Does Not Meet	Occasionally Meets	Meets	Exceeds
<i>Below: Record up to three activities or routines that fall into the red zone (from Step 1).</i>	B

WORKSHEET #2
PEAT's Log

Today's Date: Child's Name: Routine or Activity:

Baseline Date: Follow-up 1 Date: Follow-up 2 Date: Follow-up 3 Date:

For each routine and activity listed in Step 2 of Worksheet #1, create a log. Then complete Worksheet #3.

<p>Detail what is happening now during this routine or activity.</p>	<p>Detail plans to change the physical environment if appropriate.</p>
<p>Detail what you want it to look and sound like when this routine or activity is working well.</p>	<p>Detail plans for a trial of universal assistive tools if appropriate.</p>
<p>Once physical environment feature and/or assistive tool solutions are tried, detail what is happening now.</p>	<p>Detail plans for a trial of modified assistive tools if appropriate.</p>
	<p>Detail plans for a trial of specialized assistive tools if appropriate.</p>
	<p>Not Working— Go back to the collect stage in the CAR process and gather more information that may lead to additional solutions.</p>
	<p>Working— Continue using solutions and document in the child's service record (e.g., IFSP, IEP).</p>

WORKSHEET #2
PEAT's Log

Today's Date: Child's Name: Routine or Activity:

Baseline Date: Follow-up 1 Date: Follow-up 2 Date: Follow-up 3 Date:

For each routine and activity listed in Step 2 of Worksheet #1, create a log. Then complete Worksheet #3.

<p>Detail what is happening now during this routine or activity.</p>	<p>Detail plans to change the physical environment if appropriate.</p>
<p>Detail what you want it to look and sound like when this routine or activity is working well.</p>	<p>Detail plans for a trial of universal assistive tools if appropriate.</p>
<p>Once physical environment feature and/or assistive tool solutions are tried, detail what is happening now.</p>	<p>Detail plans for a trial of modified assistive tools if appropriate.</p>
	<p>Detail plans for a trial of specialized assistive tools if appropriate.</p>
	<p>Not Working— Go back to the collect stage in the CAR process and gather more information that may lead to additional solutions.</p>
	<p>Working— Continue using solutions and document in the child's service record (e.g., IFSP, IEP).</p>

WORKSHEET #2
PEAT's Log

Today's Date: Child's Name: Routine or Activity:

Baseline Date: Follow-up 1 Date: Follow-up 2 Date: Follow-up 3 Date:

For each routine and activity listed in Step 2 of Worksheet #1, create a log. Then complete Worksheet #3.

<p>Detail what is happening now during this routine or activity.</p>	<p>Detail plans to change the physical environment if appropriate.</p>
<p>Detail what you want it to look and sound like when this routine or activity is working well.</p>	<p>Detail plans for a trial of universal assistive tools if appropriate.</p>
<p>Once physical environment feature and/or assistive tool solutions are tried, detail what is happening now.</p>	<p>Detail plans for a trial of modified assistive tools if appropriate.</p>
	<p>Detail plans for a trial of specialized assistive tools if appropriate.</p>
	<p>Not Working— Go back to the collect stage in the CAR process and gather more information that may lead to additional solutions.</p>
	<p>Working— Continue using solutions and document in the child's service record (e.g., IFSP, IEP).</p>

WORKSHEET #3

PEAT's Hub-n-Spokes

Today's Date: Child's Name: Solution:

This worksheet is completed to illustrate which of the successful physical environment features and/or assistive tools may be generalized across activities/routines and/or settings.

1. In the center circle list the child's physical environment features and/or assistive tools currently in use.
2. In the outer layer of circles describe up to five routines and activities and how the **PEAT** solution(s) is/are used (e.g., duration, position, frequency, delay response, etc.).
3. In the boxes, list indicators that the child is meeting your participation expectations.

WORKSHEET #4
PEAT's Add-On

Today's Date:

Child's Name:

This worksheet records all of the additional data collection tools/forms used as suggested in the Additional Resources section. Check the box for each of the additional resources used for this Pilot. **PEAT's** Primary Sources on the USB drive provides an annotated listing of these resources.
