

# Paula's ADAPTATION NOTES

- What is currently happening?

*Jace is having a difficult time staying with the group during music time. He throws instruments, covers his ears, squirms, rolls around and tries to run away from the group.*

- What would you like to see happen?

*I want the children to pay attention, sing and take part in the activities for the 10 minute music time. I want Jace to participate as well.*

- How can we change the environment?

*Shorten music time to 5 minutes.*

- How can we change the activity?

*Replace the louder music with soothing classical music and lullabies*

- How can we change the materials?

*Limit the number of different instruments being used by the children at one time (e.g., focus on having the children clap or use one instrument like maracas instead of many instruments at one time.)*

- How can we change the requirements or instructions?

- How can we provide assistance?

- After you have made the changes, what is currently happening?
